
Class II Permissive Change Letter

October 15, 2021
MSBD-21-F008

Federal Communications Commission
Authorization and Standards Division
7435 Oakland Mills Road
Columbia, MD 21046 USA

Subject: Class II Permissive Change Application for Panasonic Single Modular Model WW21A under
FCC ID: ACJ9TGWW21A / Certified Under FCC Parts 22H, 24E, 27, 90 and 96
For Installation within Panasonic Personal Computer Model FZ-G2

To whom it may concern:

Pursuant to CFR§ 2.1043, Panasonic Corporation of North America hereby requests a Class II Permissive Change for its application with FCC ID: ACJ9TGWW21A, which was granted by UL Japan, Inc.

This authorization only covers the Class II permissive change application for the following changes:

- LTE band 48 Antenna gain value was changed higher than original application. Thereby, B48 power setting value was changed lower than original application.
- 5GNR band n41 power setting value was changed lower than original application due to RF exposure compliance.
- Mobile to Portable Classification due to Installation into Panasonic PC (Model: FZ-G2)
- This module used in the Host PC FZ-G2 has the power reduction mode which is specially programmed and tuned to operate at a lower power setting than the original maximum power to ensure that the output power does not exceed the targets described in the SAR report.
- Collocation with Wireless Module Model: WL20B with pre-existing FCC ID: ACJ9TGWL20B, whose SAR test data is included in this application.
- The Host PC FZ-G2 doesn't support LTE band 30 and Inter band Uplink Carrier Aggregation which is disabled at the factory.
- No other radio parameters have been changed.

Thank you for your attention in this matter.

Sincerely,

Ben Botros
Manager – Regulatory and Compliance
Panasonic Corporation of North America
