

Note: This application is made as a Class 2 permissive change to the original filing with the FCC identifier ACLAP4W01, and a Grant of Certification dated 1/31/00.

The differences in construction, from the original application, are only the addition of two possible alternate magnetrons (Types 2M261-M32 and 2M258-M32).

This application is also adding an additional producing factory, located in Shanghai, China. All models produced at this factory will have an added suffix "F" as part of the model number. A sample of the FCC label is sent under exhibit 3A, for the Shanghai, China factory.

The added information to this report is located at the end, in bold type. A complete re-submission is not being sent as some exhibits do not change.

The original application information is included only for comparison purposes. The original application filed shows only magnetron type 2M261-M32 employed.
