SUBJECT: FILING FOR CERTIFICATION GRANTEE CODE ACL

We are sending application for models with FCC Identifier ACLAP6Z01. This is a Class II permissive application and consequently we are sending data as previously submitted and data for the new revision construction. The new construction is simply a power line filter circuitry board. Changes are just the location to the oven fuse and connections to the power cord. Photographs with this change are in the report.

In the submission you will find exhibits for measurements taken in both Radiated and Line Conducted modes. As permitted by FCC rules, these measurements were taken by separate labs. Each of these labs is registered and has submitted documents which are on file with the FCC. Efforts are currently under way to have all measurements taken by the same lab, in the future. For a quick reference to all of the exhibits submitted, please reference the Application Index and Summary.

If there are any questions pertaining to this application, please contact me.

Sincerely,

George Vazquez
Engineer, Codes & Safety
