Re: FCC ID: ACQWACA_ATCB003664

Dear Mr. Ward,

The purpose for the permissive change request is due to a component change that could possibly change the emission characteristics of the Model WACA-d radio. The original submission used a 16MHz clock (Y1) controlling the BC358239A radio chip. Under the recommendation of the chip manufacturer the oscillator was changed to 12MHz. It was found that the 12MHz clock reduced audio output noise.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Michael Welty'.
