

B621 0

The image shows a green PCB with several components. On the left, there are two rectangular components, possibly capacitors or connectors, with purple and silver markings. In the center, there is a small surface-mount component labeled '100' and a larger component with a coiled spring. On the right, a silver metal bracket is mounted. The PCB has multiple circular holes, some of which are filled with orange solder. The text 'B621 0' is printed in white in the upper central area.
