

Sony Group Corporation

## Declaration Regarding PCB Trace Reference Design

**Date: 2026-09-25**

**FCC ID: AK8102550311**

To Whom It May Concern:

We, Sony Group Corporation, hereby acknowledge that the subject module has an authorized reference trace design as specified in the original FCC certification filing by the original manufacturer/grantee.

Sony Group Corporation agrees to abide by the requirements specified by the original manufacturer for the exact shape and dimensions of the authorized reference trace, as documented in the original FCC filing.

Sony Group Corporation will provide its customers and host integrators who install the module with the same authorized reference trace information, including the exact shape and dimensions, as specified in the original filing, together with any applicable integration requirements necessary to maintain compliance with the module certification.

Sony Group Corporation further acknowledges that any change to the shape and/or dimensions of the authorized reference trace requires a Class II Permissive Change (C2PC) to authorize the new reference trace design prior to its use under the module certification.

Sincerely,

---
