Dear Dennis,

Hello, Dennis.

Please find our reply to your comments dated July 16, 2003 below:

1. 2-condition statement

Due to the granulated coating, the surface of blanket is rough and a larger label than FCC ID label would be easily come off (removed) . If 2 condition statement is put on label, then the label would be larger than FCC ID label. Therefore, the applicant include the statement in users manual.

Since the products are already prepared and packed for shipping, please allow them to include the statement in users manual.

2. Bad edge compliance

--->> We revised page 20 of Test report. If this is okay, then we will upload this page to your website
