

MEMORANDUM FOR CONSIDERATION

(SUBMITTED AFTER APPLICATION WAS ELECTRONICALLY UPLOADED)

TO: FCC REVIEWING ENGINEER
FROM: JIM HAYNES
SUBJECT: FREQUENCY RANGES AND CELLULAR WARNING LABEL
FCC ID: AMWUB268A

Please note that the Frequency Range(s) entered under the Equipment Specifications are duplicates of our original application submission. However, in reviewing the Grant of Equipment Authorization (issued June 20, 1997) it appears that these frequencies were "rounded" and in some cases combined. Therefore, when comparing the Frequency Range(s) of this application against the FCC's database, they may not completely agree.

Additionally, the Cellular Modification Warning Label mandated pursuant to new Part 15.121(f)(1) is not an "ID Label" but we could not find a more suitable Exhibit heading to upload this drawing. Therefore, the label is located under the Exhibit as an "ID Label & Location Information".

Please contact the undersigned if you need any further clarification on this matter.

Regards,

Jim Haynes
