

Memo & Reminder

Date: August 1, 2002
To: FCC Lab - Reviewing Engineer
From: Jim Haynes
RE: FCC Part 0.457(d)(1)(ii) - FCC Id: AMWUB316

Please see below the copy of the above reference rule regarding the confidentiality of certain documentation included in Equipment Authorization Applications for Scanning Receivers.

=====

(ii) Applications for equipment authorizations (type acceptance, type approval, certification, or advance approval of subscription television systems), and materials relating to such applications, are not routinely available for public inspection prior to the effective date of the authorization. The effective date of the authorization will, upon request, be deferred to a date no earlier than that specified by the applicant. Following the effective date of the authorization, the application and related materials (including technical specifications and test measurements) will be made available for inspection upon request (See §0.460). **Portions of applications for equipment certification of scanning receivers and related materials will not be made available for inspection. This information includes that necessary to prevent modification of scanning receivers to receive Cellular Service frequencies, such as schematic diagrams, technical narratives describing equipment operation, and relevant design details.**

=====

Therefore, although no Request for Confidentiality has been filed with this application, it is assumed that the schematics, block diagrams, and operational descriptions will be kept from public disclosure.

Thank you for your consideration in this matter. If you have any questions regarding the above, please do not hesitate to contact me at ([jhaynes @ uniden.com](mailto:jhaynes@uniden.com)) or by telephone at (843) 374-3852.
