1. Host PC Information

1.1 IBM ThinkPad T40 Series

The inverted F-figure type antenna is built in the top of the LCD, and the coupled floating element antenna is built in the right side of the LCD. Those diversity antennas are not used simultaneously. One of the antennas is selected automatically or manually to have a good quality of radio communication. The selected antenna performs transmission or receiving in half duplex alternatively.

1.2 IBM ThinkPad X30 Series

The two inverted F-figure type antennas are built in the left and right side of LCD. Those diversity antennas are not used simultaneously. One of the antennas is selected automatically or manually to have a good quality of radio communication. The selected antenna performs transmission or receiving in half duplex alternatively.

2. Host PC Labeling

2.1 Labeling of T40 Series

Label for a different model of the host PC (ThinkPad T40 Series)

The model (T40) supports the applying transmitter and a built-in type Bluetooth LMA which is to be certified separately as the FCC ID: ANO20020100MTN.

**TX FCC ID for an installed CDC
transmitter card located under
customer removable Keyboard**
