1. Host PC Information

The main antenna, meander type, is built in the left top side of LCD and the auxiliary antenna, meander type, is built in the top right side of LCD as shown in the Photo.

Those diversity antennas are not used simultaneously. One of the antennas is selected automatically or manually to have a good quality of radio communication. The selected antenna performs transmission or receiving in half duplex alternatively.

FCC ID and IC's Certification Number is visible when the Customer Access Panel is removed.
