800 Independence Ave
Washington, DC 20591

Dear Mr. Nellis

Per our discussion, enclosed please find Honeywell's data package submitted to the FCC to obtain FCC authorization for the TPL-100A. Honeywell has authorized CKC Laboratories, Inc., to act on their behalf in technical matters relating to application to the FCC for equipment authorization of the TPL-100A MILACAS-FR Processor (Honeywell Part No 940-0530-001), including signing documents relating to the application. Any and all acts carried out by CKC Laboratories, Inc.; on our behalf shall have the same affect as acts of our own.

Following this application, we are also coordinating TSO submittal with the Seattle ACO. We expect to formally submit late in June, and are working to receive TSO approval by the end of July 2006.

Please do not hesitate to call if you have any questions.

Sincerely,

Larry D. King
