- Operating multiple Robo Runner toys with the same frequency in close proximity will cause interference and poor performance. Works best away from high voltage power lines, large buildings and walls. Keep the transmitter at 5 feet or less from the Robo Runner for best performance. Hold transmitter antenna up for best performance. Works best on flat, hard smooth surfaces. Do not operate Robo Runner in water.

Check the battery installation if product malfunctions. When the product does not respond, loses range, or slows down, replace the batteries. For longer life use only alkaline batteries.
