

Part 15 Antenna Information

Description:

The device uses two bent wire antennas. The device can switch between the two antennas.

Antenna A:

Antenna B:

Ruler dimensions are in centimeter.

Measured gain:

Antenna A:

Maximum Gain derived from EIRP and conducted measurement:		Maximum Gain (dBi)		
Test condition		2402 MHz	2440 MHz	2480 MHz
T_{nom} 23 °C	V_{nom} (9)V	3.06	3.39	3.89

Antenna B:

Maximum Gain derived from EIRP and conducted measurement:		Maximum Gain (dBi)		
Test condition		2402 MHz	2440 MHz	2480 MHz
T_{nom} 23 °C	V_{nom} (9)V	3.39	3.81	4.3

Details are given in the test report exhibit.
