Attn: OET Dept.

Ref: FCC Class II Permissive change for FCC ID: APIJBLFLIP4A

Applicant: Harman International Industries, Inc.

Dear Examiner,

This is to request a Class II Permissive change for FCC ID: APIJBLFLIP4A originally granted on 10/26/2017 (date).

The change under this application as following:

1. changes the audio amplifier IC TPA3130D2DAPR(U6) to AW83118TSR(U6) by pin to pin;
2. changes expansion IC TCA1116PWR(U5) to TCA1116RTWR(U11)

The above changes don't affect the wireless module. This change based on engineering judgment that only Radiated Emission (below 1 GHz) and Power Line Conducted Emissions need to test. There is no RF parameter change to the operating frequency band, rated radiated and conducted output power of the device.

I attest that the certified device will not be capable of ad-hoc mode operation outside of the grant conditions.

Sincerely,

Signature:

Name: Terry Shi
