Subject: Application of Class II Permissive Change for Microwave Oven

Application Type : Certification (Class II Permissive Change)
FCC ID Code : APYDMR0113
Model No(s). : KSA-8574A
Brand Name : Admiral (Brand name of Montgomery Ward & Co.)
Applicant : Sharp Corporation
Manufacturer : Sharp Appliances (Thailand) Ltd.

Gentleman:

We would like to make a Class II permissive change application of FCC Certification for our microwave oven classified in the FCC ID Code APYDMR0113.

We are going to introduce the household microwave oven Model KSA-8574A which will have a first production in the end of May 1999 at our factory; Sharp Appliances (Thailand) Ltd.

The model KSA-8574A is a minor variation model from the currently authorized model KSA-8573A, etc., which is classified under the FCC ID Code: APYDMR0113. The difference from the base model is the increased RF output power rating to 1100 W from 1000 W of base model by the revised electrical components in high voltage circuit. The construction except the high voltage electrical components are identical with the currently authorized base model. For this increased RF output power rating, we submit here with the application of Class II permissive change with the measurement data.

Enclosed are the application material listed as follows:

1. FCC Form 731
2. Information for Certification
3. Measurement Report by Japan Quality Assurance Organization
(Tested on representative model KSA-8574A)

- to be continued -

SHARP CORPORATION
