FCC ID: APYDMR0121

EXHIBIT A

PURPOSE OF FILING

The purpose of this filing is to request certification for a new model family of microwave ovens. The output power for this model family is 1100 Watts as measured by the IEC 705 method, 1988 revision. These models are cord connected counter top / built in Microwave Ovens. The magnetrons used with these models have been used on previously certified products. The power transformer is a new design. The chassis design and waveguide are similar to the design for models listed under FCC ID APYDMR0114. There are some modifications in the dimensions of the cooking area.
