Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

Enlighted Inc. hereby requests a Permissive Change Class II of the radio equipment certification for the GW-2-00 certification number, FCC ID: AQQ-GW2. This product differs from the originally approved product in the following manner:

(a) Antenna Characteristics – The external antenna has been changed from Pasternack Enterprises Model No. PE51081 to Nearson Model No. P/N S151AH-07826.
(b) Model Name – Changed from GW-2-00 to GW-2-01 for logistics purposes.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Tanuj Mohan
CTO
Enlighted Inc.
