

Response for Request for information (request sent 12/28/01) for

Re: FCC ID ARURPV516A

Applicant: RELM Communications Inc

Correspondence Reference Number: 21597

731 Confirmation Number: EA811923

- 1) Your list on 12/26/01 indicates that this device operates on Marine Frequencies of 156.10 MHz channel 02, 156.20 MHz channel 04 and 04A, 156.025 MHz channel 60, 156.125 MHz channel 62. It is forbidden to transmit on these frequencies for Marine Part 80 operation. Please explain.

The unit is dealer or factory programmable and the dealer or factory is going to program only the frequencies that the end user has license for.

- 2) Exhibit 8 Revised Manual 121901 uploaded on 12/27/01 is a SAR report. Your reply question 11 on 12/27/01 states we have provided an updated manual since the original one was preliminary. Please submit a revised Users Manual.

This has been uploaded again.

Additional Note: Celltech discovered a few errors in revised test reports for RF Exposure. I have provide the most recent version of these files as well.
