EXHIBIT 6

Section 2.1033 (c)(10)

A description of all circuitry and devices for determining and stabilizing frequency.

The Cellular TDMA/Analog Multi Carrier Linear Amplifier (CMCLA), Part Number 44WA29, subject of this Class II Permissive Change request, is a base station linear power amplifier in the Cellular Frequency Band 869.04 – 893.97 MHz and does not contain or incorporate circuitry and devices for determining and stabilizing frequency.
