Before you start

This document describes the information and operations required for startup. For more advanced operating procedures, read the instruction manual which is available on the website.

1. Set Contents

Confirm the presence of all parts and components before use.
1. Headphones
2. Micro-USB cable
3. Headphone cord
4. Carrying case
5. Quick Start Guide (this document)
6. Headphone jack
7. Headphone cord

2. Names of Parts (See Fig. 2)

1. N-mark
2. Button
3. Play / Pause button
4. Headphone jack
5. LED indicator
6. Button (O)
7. Headphone cord
8. Micro-USB port
9. Headphone jack
10. Microphone

3. Charging the batteries

The unit's battery must be recharged before use.
The accessory micro-USB cable must be used for recharging the unit's battery.
Connect the appropriate connector to the cable accessory micro-USB to the micro-USB port on the headphones, and the USB plug on the other end to a USB port on a computer (See Fig. 3).
When recharging begins, the LED indicator on the headphones will light red.
Full recharging requires about 4 hours; when recharging is completed, the LED indicator will turn off.

Note
• Battery recharging time and usable battery time may vary depending on ambient temperature and usage.
• Battery recharging time and usable battery time may vary depending on ambient temperature and usage.

Notes on battery charging
• Battery recharging is influenced by the surrounding temperature. Charge the supplied rechargeable batteries within a temperature range of 10 to 35 degrees Celsius. Batteries become slightly warmer when charging. This is not a malfunction.
• Recharging may not be possible if computer is in power saving mode.
• This device cannot be used during charging.

4. Pairing

Pairing must be performed before the headphones can be used to listen to music or communicate using a Bluetooth device.
For further details regarding the pairing procedure, consult the user's manual for your Bluetooth device.

- While the power of the unit is off, hold down the (O) button until the unit enters pairing mode.
The pairing mode is confirmed by the LED indicator's alternately flashing blue and red. Release the (O) button after confirming that the LED indicator is alternately flashing alternately.
- Turn on the power to the Bluetooth device you wish to pair with, and begin pairing. Search for this unit (wireless headphones) from the paired Bluetooth device.
The Bluetooth device will appear (within one meter) to the wireless headphones. These wireless headphones will appear in the Bluetooth device's display as "Pioneer SE-MS9BN".
- Confirm that pairing has been successfully completed with the Bluetooth device.
Look at the display for the Bluetooth-enabled device and select "SE-MS9BN". When the LED lamp is flashing in blue slowly about once every 3 seconds, pairing is complete. When it is flashing quickly about once every second, pairing is not complete.
The PIN code for these wireless headphones has been factory set to "0000". Input this code if requested by the Bluetooth device.

Connect to the Bluetooth device

- Confirm that the power to the wireless headphones is ON before connecting to the Bluetooth device.
- Depending on the device, connection between the wireless headphones and the Bluetooth device may be performed simply by merely pairing the device with the headphones.
- Depending on the device, connection between the wireless headphones and the Bluetooth device may be performed simply by merely pairing the device with the headphones.

Disconnecting from the Bluetooth device

- Hold down the (O) button until the flashing LED lamp turns off and the power of the device turns off.
- Hold down the (O) button until the flashing LED lamp turns off and the power of the device turns off.

5. Using NFC for pairing

When a smartphone or tablet device is equipped with NFC, Bluetooth pairing (and pairing) can be performed simply by merely pairing the device with the headphones.
Depending on the smartphone or tablet device used, the NFC signal reception may be too weak to perform one-touch connections. The unit may pair with a device other than the desired one if multiple NFC devices are nearby. In that case, follow the manual pairing procedure as described in step 4.

1. Set Contents

Confirm the presence of all parts and components before use.
1. Headphones
2. Micro-USB cable
3. Headphone cord
4. Carrying case
5. Quick Start Guide (this document)
6. Headphone jack
7. Headphone cord

2. Names of Parts (See Fig. 2)

1. N-mark
2. Button
3. Play / Pause button
4. Headphone jack
5. LED indicator
6. Button (O)
7. Headphone cord
8. Micro-USB port
9. Headphone jack
10. Microphone

3. Charging the batteries

The unit's battery must be recharged before use.
The accessory micro-USB cable must be used for recharging the unit's battery.
Connect the appropriate connector to the cable accessory micro-USB to the micro-USB port on the headphones, and the USB plug on the other end to a USB port on a computer (See Fig. 3).
When recharging begins, the LED indicator on the headphones will light red.
Full recharging requires about 4 hours; when recharging is completed, the LED indicator will turn off.

Note
• Battery recharging time and usable battery time may vary depending on ambient temperature and usage.
• Battery recharging time and usable battery time may vary depending on ambient temperature and usage.

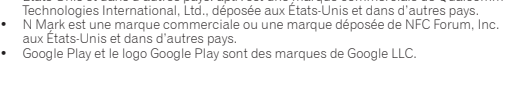

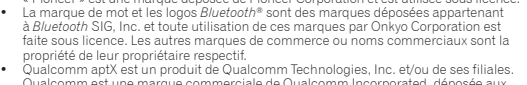

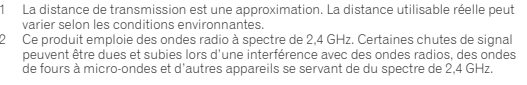

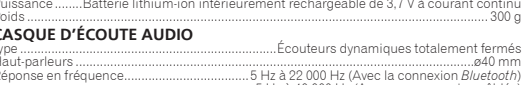

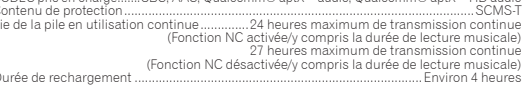

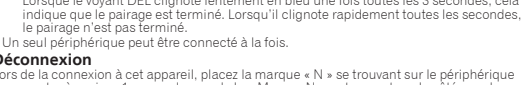

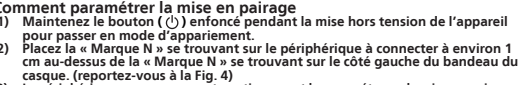

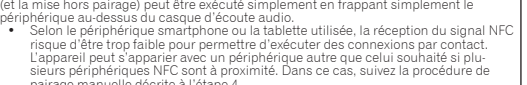

Notes on battery charging
• Battery recharging is influenced by the surrounding temperature. Charge the supplied rechargeable batteries within a temperature range of 10 to 35 degrees Celsius. Batteries become slightly warmer when charging. This is not a malfunction.
• Recharging may not be possible if computer is in power saving mode.
• This device cannot be used during charging.

4. Pairing

Pairing must be performed before the headphones can be used to listen to music or communicate using a Bluetooth device.
For further details regarding the pairing procedure, consult the user's manual for your Bluetooth device.

- While the power of the unit is off, hold down the (O) button until the unit enters pairing mode.
The pairing mode is confirmed by the LED indicator's alternately flashing blue and red. Release the (O) button after confirming that the LED indicator is alternately flashing alternately.
- Turn on the power to the Bluetooth device you wish to pair with, and begin pairing. Search for this unit (wireless headphones) from the paired Bluetooth device.
The Bluetooth device will appear (within one meter) to the wireless headphones. These wireless headphones will appear in the Bluetooth device's display as "Pioneer SE-MS9BN".
- Confirm that pairing has been successfully completed with the Bluetooth device.
Look at the display for the Bluetooth-enabled device and select "SE-MS9BN". When the LED lamp is flashing in blue slowly about once every 3 seconds, pairing is complete. When it is flashing quickly about once every second, pairing is not complete.
The PIN code for these wireless headphones has been factory set to "0000". Input this code if requested by the Bluetooth device.

5. Using NFC for pairing/Utilisation de NFC pour le pairing/Verwendung von NFC zur Paarung/ Uso di NFC per il pairing/Empleo de NFC para el apareamiento/ Gebruik van NFC voor het koppelen

Connect to the Bluetooth device

- Confirm that the power to the wireless headphones is ON before connecting to the Bluetooth device.
- Depending on the device, connection between the wireless headphones and the Bluetooth device may be performed simply by merely pairing the device with the headphones.
- Depending on the device, connection between the wireless headphones and the Bluetooth device may be performed simply by merely pairing the device with the headphones.

Disconnecting from the Bluetooth device

- Hold down the (O) button until the flashing LED lamp turns off and the power of the device turns off.
- Hold down the (O) button until the flashing LED lamp turns off and the power of the device turns off.
