Operation

Install Batteries

1. Pull lock tab down and lift door up (towards you) to remove battery cover.
2. Insert four "AAA" batteries. Position batteries according to polarity markings.

Note : When batteries are low or need charging the  BATT LOW indicator will blink. Replace alkaline batteries.

Operation

LCD Display

Operation

Turning On Your Unit

Rotate ON - OFF Volume Control "*clockwise*".

An audible "TONE" will indicate the unit is on and then the LCD will go through a 3 second self-test and then go to operational mode.

Operational Mode

Note : Whenever the unit is on, you can receive communications.

Auto Battery Power Saver

Your unit has a unique circuit designed to extend battery life. If there are no transmissions within 5 seconds, the unit will automatically switch to battery save mode.

Flashing icon

The SAVER icon will flash

Note : The Auto Battery Save Circuit does not effect the unit's ability to receive incoming transmissions.

Operation

Select Main Channel (1-14)

Rotate ON - OFF Volume Control "*clockwise*".

- 1.) An audible "tone" will indicate the unit is on and then the LCD will go through a 3 second self-test and then go to operational mode.

- 2.) Select channel by pushing and releasing Channel (Up/Down) buttons.

Channel Scan

Push and hold the Channel (Up/Down) buttons for fast channel advance. To stop Channel Scan, press PTT or Enter button.

Note :

- 1.) Unit must be on same channel and subchannels to communicate.
- 2.) Channels 8-12 generally are less used and give better results for communications in most areas.

Operation

Select CTCSS Subchannel (00-38)

The CTCSS Subchannel allows the user to utilize a less used channel range (00-38) within a main channel.

- 1.) Rotate ON - OFF Volume Control "*clockwise*".
An audible "tone" will indicate the unit is on and then the LCD will go through a 3 second self-test and then go to operational mode.
- 2.) Select main channel by pushing and releasing **Channel (Up/Down)** buttons.

Push & Release

Operation

- 3.) Push and release FUNC. button. Small numbers flash next to channel display on LCD.

Note : CTCSS (Continuous Tone Controlled Squelch System) is an advanced subcoding system that allows segmentation of a main channel.

Operation

- 4.) Select subchannel number by pushing and release Channel buttons.

- 5.) When desired subchannel is displayed push and release Enter button.

Operation

Calling Another Party

To alert another party that you wish to communicate :

- 1.) Turn on your MK 1980 2-way radio. An audible "tone" will indicate the unit is on. The LCD will go through a 3 second self test and then to operational mode.

- 2.) Select desired channel by pushing and releasing Channel buttons.

Push & Release

Note : Both the calling and receiving units must be on same channel and subchannel for the call function to work.

Operation

- 3.) Push and release Call Button. The  indicator icon will flash and the  icon will remain on for 3 seconds. The unit you are calling will hear a 2 second ring tone.

Note : Your incoming "Call" audio ringing level is dependent on your unit's volume setting.

- 4.) Wait for the party's response or proceed to "Talking To Another Party" section on next page.

Operation

Talking To Another Party

To send your outgoing message :

- 1.) Turn on your MK 1980 2-way radio. An audible "tone" will indicate the unit is on. The LCD will go through a 3 second self test and then to operational mode.

- 2.) Push and hold PTT button.

Note : While **PTT** button is depressed you cannot receive incoming calls.

Operation

- 3.) The  icon will appear.

- 4.) Hold mic about 2 inches from mouth. Speaker in a normal voice.
- 5.) Release PTT button and listen for response.

Note : When you release the PTT button, the person you are talking to will hear a tone indicating that it's ok to talk. See talk Confirmation Tone section.

Operation

Talk Confirmation Tone

Your listener will hear an audible tone when you release the PTT button. This alerts the other party that you are finished talking and it's OK for them to begin talking.

To set tone press and hold **Enter** button for 2 seconds. 🎵 icon appears. To cancel press and hold **Enter** button again. 🎵 icon disappears.

Listening For Another Party

When finished talking :

- 1.) Release PTT button to receive incoming transmissions.

Your MK 1980 is always in listening mode when the PTT button is not pressed and you are not in function mode. See Advanced Features section.

Note : While PTT button is depressed you cannot receive incoming calls.

Operation

Auto Squelch

Your MK 1980 is equipped with Auto Squelch, which automatically shuts off weak transmissions and unwanted noise due to terrain conditions or if you have reached your range limit.

Monitor

Auto squelch can be temporarily removed to allow all signals to enter by pressing the **(M)** button (Monitor).

- 1.) Push and hold the **(M)** button allow all signals to enter.

External Microphone / Speaker Jack

External Microphone Jack

Your MK 1980 can be fitted with an external microphone freeing your hands for other tasks.

To attach the external microphone.

- 1.) Open Mic/Spkr tab on top of unit.

- 2.) Insert jack into the Mic port.

Note : External microphone is included and external speaker is not included with this unit .

Advanced Features

Lock Function

The purpose of the LOCK function is to lock most buttons to avoid accidental operation.

To engage the LOCK function :

- 1.) Push and hold Lock button for 2 seconds.  icon appears. Most buttons are locked.
- 2.) To "unlock" push and hold Lock button for 2 seconds again. Button are "unlock" and  icon disappears.

Note : Call button, Monitor button and PTT button do not lock are fully operational while the unit is locked. The unit cannot lock while in function mode.

Note :

In case you hear " beep " while beep indicator does not show on the LCD Display, turn off and turn on the unit for reset.

Advanced Features

BEEP Function

The BEEP icon

Set Beep

- 1.) Press the **Function** button.
- 2.) Press the **Lock** button. **BEEP** icon appears.
- 3.) Press the **Enter** button to turn on **BEEP**.

Cancel Beep

- 1.) Press the **Function** button.
- 2.) Press the **Lock** button. **BEEP** icon disappears.
- 3.) Press the **Enter** button to turn off **BEEP**.
