Re: FCC ID: AZ489FT7005
Applicant:: Motorola, Inc.
Models: F4420A & F4425

Gentlemen:

Spectrum Technology, Incorporated has tested the above referenced transmitter in accordance with the applicable requirements contained in the Parts 2 and 15 of Title 47, CFR. To the best of my knowledge, these tests were performed using the criteria established in ANSI or other Industry standards. The measurements demonstrate that the Intentional Radiator, a Bluetooth device, complies with the limits established in Part 15.247. The digital device emissions were measured and met the Part 15.109, Class B limit. The receiver is exempt from the Part 15.109 requirements as it is above 960 MHz. The applicable rule sections are listed in the following test report.

The open area test site used for the radiated emissions measurements is located at Fluke Park II in Everett, Washington. The site information required by Part 2.98, measured in accordance with ANSI C63.4-1992, was most recently renewed with the FCC and accepted by the FCC Sampling and Measurements Branch in August of 2001.

This site is also acceptable to Industry Canada for the performance of radiated measurements. Test site information required by RSS-212, Issue 1 (provisional) was most recently renewed with IC in January 2002. The site file number is IC 2089.

Sincerely,

A handwritten signature in black ink that reads "Rod Munro".

Rod Munro
