Re: Application for a Class II Permissive Change request to certificated
transceiver with **FCC ID: AZ489FT7008.**

Gentlemen:

On behalf of Motorola Inc., 8000 West Sunrise Boulevard, Fort Lauderdale, Florida 33322, we submit this reply to NW EMC's TCB comments dated March 18, 2004 regarding the referenced a request for a Class II Permissive Change.

Item 1) Revised SAR exhibit one of three is submitted with Occupational/Controlled Exposure statements corrected to General Population/Uncontrolled.

Item 2) Prior to final shipment to customers, Motorola re-measured the SAR values and determined that the values reported in the original grant application were degraded but still compliant with FCC RF exposure limits. The previous SAR data was based on a prototype and the current SAR filing is based on the pilot run. The variation in the SAR values is related to the antenna being optimized from the prototype antenna to the final production version of the antenna. All of the original exhibits filed, including but, not limited to the schematics, block diagrams, parts list, theory of operation and user manual remain unchanged.

Please call me at 425 771-4482 if you should require any further information.

Best Regards,

A handwritten signature in black ink that reads "Rod Munro".
