Re: Action Requested

Grantee: Motorola, Inc.

Gentlemen:

On behalf of Motorola, Inc., we request Certification for the above referenced device, which contains two internally integrated co-located transmitters. The Enhanced PowerPad, Model: F4421A and Model: F4426A which are "identical" as defined by Part 2.908, with cosmetic appearance changes only, are ruggedized handheld data terminals which contain the following:

- 1.) A Bluetooth Intentional Radiator, manufactured by Motorola, Inc., previously Certified under part 15.247 in the Motorola PowerPad with the FCC ID: AZ489FT7005.
- 2.) A previously certified g20, PCS GSM transceiver module under the FCC ID: IHDT56DB1, manufactured by Motorola, Inc.

For item 1 we have submitted the appropriate test data, for the six required items including exhibits for SAR, EIRP & spurious emissions. We have also referenced the twelve items which are common to all Bluetooth devices and included the list, verbatim, provided by Mr. Joe Dichoso.

For item 2 we have submitted supplemental radiated spurious and harmonic emissions, and New SAR data for this co-located transmitter combination and their internally integrated antennas. We will be referring to the original Certification test data for the other original measurements where appropriate. This OEM model would be considered "identical" to the original as defined by part 2.908.

Thank you for your time and consideration of this application. Please contact the undersigned for a prompt response should you require any additional information concerning this request for Certification.

Sincerely,
