

SETUP PHOTOGRAPHS

This document contains 5 photographs

Photograph No.1
Occupied bandwidth, carrier separation, number of hopping frequencies
measurement setup

Photograph No.2
Average time of occupancy measurement setup

Photograph No.3
Setup for carrier field strength measurements (peak output power), power density,
spurious emission field strength measurements above 1000 MHz at the OATS

Photograph No.4
Setup for final radiated emission measurements, EUT cabling

Photograph No.5
Setup for conducted emission measurements
