

EXHIBIT 2

Attestation and Product Family Declaration

(Pursuant to FCC Part 2.907, 2.908 and RSP 100 Sec 4)

a. Statement of Certification

Transceiver type described herein (AZ489FT7184/109U-89FT7184) is in compliance with all applicable parts of the FCC rules and ISED RSS standards. This device is P25 Compliant as well which meets FCC Part 90.548 and RSS 119 Section 5.11 as declared in exhibit 12

Each unit manufactured, imported, or marketed will conform to the samples tested herein, within the statistical variations that can be expected due to high volume production and test measurement error.

TITLE: Director of Engineering

b. Spectrum Efficiency Declaration

The device supports TDMA (F2) transmission with 12.5 kHz spacing. Each transmit slot is 30 ms long and it is followed by 30 ms standby / receive. Transmission in digital TDMA mode (according to 6.25e efficiency standard) allows improved spectrum utilization whereby, the existing 12.5 kHz channel now allows two voice conversations to take place instead of one. Furthermore, the portable radio has integrated voice & data feature that extends the capability of the system to send & receive data through conventional infrastructure.

This device is also capable of supporting a minimum data rate of 4800 bits per second per 6.25kHz channel bandwidth.

c. Product Family Declaration

FCC Model Number	Hardware Version Identification Number (HVIN)	Product Marketing Name (PMN)	Software Version (FVIN)	Description
H55TGT9PW8BN	H55TGT9PW8BN	APX NEXT	AP: R37.10.00* BP: R37.10.00**	APX NEXT REFRESH ALL BAND MODEL 4.5 PORTABLE
H55TGT9PW8BN	NUW4100A	APX NEXT XE	AP: D38.01.26* BP: D38.01.26**	APX NEXT XE, IMPACT GREEN, REFRESH ALL BAND MODEL 4.5 PORTABLE
H55TGT9PW8BN	NUW4101A	APX NEXT XE	AP: D38.01.26* BP: D38.01.26**	APX NEXT XE, BLACK, REFRESH ALL BAND MODEL 4.5 PORTABLE
H55TGU9PW8BN	H55TGU9PW8BN	APX NEXT XN	AP: R39.05.00* BP: R39.05.00**	APX NEXT XN, IMPACT GREEN, REFRESH ALL BAND MODEL 4.5 PORTABLE
T8954A	T8954A	KVL 7000	AP: D00.00.52* BP: D00.00.05	KVL 7000 Key Loader (Key Fill Device)

*AP (Access Point) Board: Manages non-LMR technologies (WLAN, BT, 5G, LTE, NFC and GNSS)

**BP (Main Board) Manages LMR (Land Mobile Radio) technology

Note:

2.1 WIFI and BT do not transmit at the same time as it is limited by Wifi/BT coexistence.

2.2 Only one of the WIFI frequencies (6e, 5GHz and 2.4GHz) is allowed to transmit as it is limited to one at a time by the Chip architecture.

2.3 LTE or 5G NR can transmit simultaneously with one of WiFi 6e, 5GHz or 2.4GHz

2.4 LTE or 5G NR and BT will transmit at the same time.

2.5 All the 5 models listed above are electrically identical.

2.6 The differences compared to the APX NEXT model are listed below:

- a. APX NEXT XE: features a larger top housing knob, a different speaker grill and housing color (available in green and black).
- b. APX NEXT XN: features a green-and-black housing with the same speaker bezel and flexes as the APX NEXT XE model, but with enlarged controls including the PTT and wake buttons, volume and frequency knobs, ABC switch, and a larger T-grip and bumper. This model has specific software for antenna and battery detection.

- c. KVL 7000: Compared to APX NEXT, the only difference is the control top of the housing that eliminates the top controls and antenna port. This model features a different color top side button with a green power logo. The KVL 7000 does not support 5G, LTE or LMR. It only uses the non-LMR technologies: WLAN, BT, NFC, and GNSS. While the KVL 7000 uses Wi-Fi, it does not support Wi-Fi 6e.
