

Request for Class II Permissive Change

Date: June 13, 2025

UL Verification Services Inc.
47173 Benicia Street, Fremont, CA 94538

FCC ID: AZD241
Applicant: Canon Inc.

To Whom It May Concern:

This is a Class II permissive change request for the above mentioned FCC ID, originally granted on April 6, 2020.

We would like to add a portable host model (Digital Camera, DS126913) to this module. This time, the SAR testing with the host device was performed, and the Class II permissive change application in Portable configuration is submitted. Although the antenna trace design to the antenna is different from the original trace layout, the change falls under the category of Class I changes and will be managed by us.

Please note that Bluetooth classic function is disabled by the software of the host device.

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.

☐	Test Report
☒	SAR Report
☐	External Photo
☐	Internal Photo
☐	User Manual
☐	Label Drawing/ Location
☐	Block Diagram
☒	Operational Description
☐	Schematic
☐	Parts List

This time, we performed the SAR testing and confirmed that this product still meets the minimum requirements of the applicable rules of FCC. Please refer to the test report submitted with this application.

Thank you for your attention to this matter.

Sincerely,

Sho Tanaka
Canon Inc.
