SuperBus® 2000 Commercial RF Transceiver Module

Preliminary

File: Peripherals

ITI Part # 60-821-95

Overview

The ITI® SuperBus® 2000 Commercial RF Transceiver Module adds or extends wireless zone capability to Concord™ and Advent® (and Custom Version) panels in both residential and commercial installations.

The module can be located near the panel cabinet or up to 2,800 feet away (using 18 gauge or larger wire). The module receives information from remote wireless sensors and touchpads and sends the data to the panel via the SuperBus® 2000 digital data bus.

Concord™ systems support up to two, and Advent® systems support up to five transceiver modules.

The SuperBus® 2000 digital data bus technology provides fast and reliable data transfer to the panel, and allows either automatic or manual module bus addressing.

Features

RF Transceiver Module features include the following:

- 4,000 feet typical wireless range (open air).
- Dual antennas provide spatial diversity, which minimizes wireless coverage nulls or dead spots.
- Compatibility with ITI Concord™ security and Advent® security/fire panels.
- Compatibility with all ITI 319.5 MHz crystal Learn Mode™ wireless sensors and touchpads.
- Built-in supervised, fire-rated hardwire tamper zone.
- On-board LED power, wireless packet reception, and bus status indicators.
- Attractive, wall hugging low-profile case.

Applications

- Adds wireless zone capability to hardwire Concord™ and Advent® panel installations.
- Extends wireless zone capacity of wireless Concord™ panel installations.

SuperBus® 2000 Commercial RF Transceiver Module

Specifications

Compatibility		
Panels	ITI® Concord™ (and Custom Versions) security panels. Advent® (and Custom Versions) fire/security panels.	
Sensors	ITI® 319.5 MHz crystal Learn Mode™ wireless sensors and touchpads	
Power Supply		
Power Requirements	8-14 VDC (12V nominal), 30 mA maximum (supplied by panel)	
Hardwire Zones	One supervised, fire-rated hardwire zone.	
Wireless Zones	Panel limited number of zones	
Wireless Signal Range		
Open Air Range	4,000 feet typical open air (may vary with application)	
SuperBus Cable Length		
Module to Panel Distance	Up to 2,800 feet (using 18 gauge or larger stranded wire)	
Environmental		
Storage Temperature	-30°F to 140°F (0° to 60°C)	
Operating Temperature	32°F to 140°F (0° to 60°C)	
Maximum Humidity	90% relative humidity, noncondensing	

SuperBus® 2000 Commercial RF Transceiver Module

Approvals/Listings

FCC	FCC Parts 15 and 68
UL	UL 365 for Police Connected Burglar Alarm Units and Systems (pending) UL 609 for Local Burglar Alarm Units and Systems (pending) UL 864 for Control Units for Fire-Protective Signaling Systems (pending) UL 985 for Household Fire Warning System Units (pending) UL 1023 for Household Burglar Alarm System Units (pending) UL 1076 for Proprietary Burglar Alarm Units and Systems (pending) UL 1637 for Home Health Care Signaling Equipment (pending)
ULC	Canada Commercial Fire/Burglary Warning System (pending)
DOD	Sensitive Compartment Info. (pending)
CSFM	California State Fire Marshall (pending)
NFPA	Complies with NFPA 72 for National Fire Alarm Code
FM	Factory Mutual (pending)
MEA	New York City Material Equipment Acceptance (pending)
Complies with	Complies with NFPA for Fire Alarm Code

Physical Description

Case Color	Belgian Gray
Antennas	Two 9.25"
Dimensions	6.0" x 8.5" x 1.5" (LxWxD) excluding antennas

Installation	Wall mount
