

### Label information Model : HSN-I32C

1. Images of the e-label screen are provided below:

FCC ID: B94HNI32CTKR  
Contains IC:24374-T99W175  
Contains FCC ID:PD9AX201D2  
Contains IC:1000M-AX201D2

2. The information that will be displayed on the e-label and information that will remain in the user manual is shown below:

| Information                                                                                                                                                                                                                              | on E-label | In Manual |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|-----------|
| FCC ID/IC number                                                                                                                                                                                                                         | Yes        | No        |
| <i>Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.”)</i> | No         | Yes       |
| Class A / B Digital Device user manual statements <sup>1</sup>                                                                                                                                                                           | No         | Yes       |

3. Users are able to access the information in no more than three steps in a device’s menu.  
The actual Steps are: Choose esc or F10 > Advanced > Electronic Labels  
No special access codes or permissions are required to go through the above steps beyond entering a user-defined password to protect against unauthorized access to the device.
4. The information is stored on the device, no special accessories or supplemental plug-ins (e.g., a SIM/USIM card) are required to access the information.  
No.
5. Users are provided specific instructions on how to access the information.  
Yes.
6. The above information must be programmed by the responsible party and the information must be secured in such a manner that third-parties cannot modify it.  
The e-label information is pre-programmed by the manufacturer. The user cannot modify the e-label information.
7. When e-labeling is used, a physical temporary label is also required on the product, or a label on the packaging, at the time of importation, marketing, and sales.  
The physical label will be on the packaging box.
