Ref: Application for Original Equipment Authorization for FCC ID: B94HNI32PK

Dear Examiner,

This is to request FCC Authorization for original equipment under FCC ID: B94HNI32PK.

The equipment in this application is HP model HN-I32C, 2 in 1 PC. The equipment is provided with a detachable keyboard for use in notebook or tablet mode as described within this filing.

The equipment will also include two previously authorized transmitter modules as described below.

FCC ID: B94-AX200D2LP , granted 7/10/2019 by change of ID. This is a WLAN 802.11a/b/g/n/ac/ax module that is authorized for portable/mobile conditions.

FCC ID: ZMOL860GL, granted 11/09/2018. This is a PCS licensed transmitter LTE module authorized as single modular approval to Fibocomm Wireless

Antenna specifications for these modules are included within this filing.

It is also our intention to apply the PAG re-use process for granting approvals. The full PAG review was previously performed under KDB Inquiry. We believe this application meets the conditions for PAG re-use as it is a special rf exposure compliance condition. The only differences with this PAG re-use application and the full PAG review is the authorized WWAN module is next generation using Fibocomm L860 vs older L850. The antennas, time averaging algorithm SAR and validation methods are all the same as those previously reviewed.

A handwritten signature in black ink, appearing to read 'Steven C. Hackett'.
