

Software Power Limitation Justification

Date: January 5, 2026

Federal Communications Commission
7435 Oakland Mills Road
Columbia MD 21046

To Whom It May Concern:

This application leverages the certified data of the original module (FCC ID:2AQ68T99W640). The hardware design of the host device remains identical to the original reference design. However, for the purpose of compliance and specific market requirements, Power Class 1.5 has been permanently disabled via firmware/software at the factory level. This power limit is implemented in the non-volatile memory and cannot be accessed or modified by the end-user. Therefore, the device will only operate within the parameters of Power Class as tested.

Sincerely,

Name: Jim Chang
