Dear Bill-san,

Thank you very much for your cooperation so far.

About 24GHz Motion Sensor (FTL358), this device is not operate when the vehicle is moving, however, when user stops the vehicle and sets the alarm the device starts continuous transmission. In this case, do you think this device not satisfy requirement of 15.245(b)(1)(iii)?

If you cannot accept, we will revise the test report and issue the test report in accordance with 15.249. Since this device can satisfy the requirement of 15.249.

Please advice.

Best Regards,

Keijiro
