Subject: Request to place FCC ID: BBP-WLEIG01 in audit mode and supersede test report exhibit

To whom it may concern,

We, BTL Inc., are requesting to place FCC ID: BBP-WLEIG01 in audit mode. We found that the correct factors of radiated emission below 1 GHz in the DTS/NII test report exhibits are mis-applied with factory factors instead of new calibrated factors. And we have verified that the test results with the new factors are still in compliance with the requirements of the FCC regulations and updated the test reports.

If you have any questions regarding this application, please feel free to contact me.
