

Welcome to your Apple Magic Keyboard

Your Apple Magic Keyboard has a rechargeable battery and uses Bluetooth® technology to connect wirelessly to your Mac.

This guide shows you how to use your Magic Keyboard, including pairing, customization, recharging the battery, and updating macOS.

Update your software

To use your Magic Keyboard and its full range of features, update your Mac to OS X v10.11 or later.

To update to the latest version of macOS, choose Apple menu > App Store to see if there are updates. Follow the onscreen instructions to update macOS.

Set up your Magic Keyboard

Use the Lightning to USB cable that came with your keyboard. Plug the Lightning end into the Lightning port on your keyboard,

and the USB end into a USB port on your Mac. Slide the keyboard on/off switch to on (so you see green on the switch).

Your keyboard will pair automatically with your Mac.

After the keyboard is paired, you can disconnect the cable and use your keyboard wirelessly.

Remove a pairing

After you pair your Magic Keyboard with a Mac, you can pair it again with a different Mac. To do this, remove the existing pairing and then pair the keyboard again using the setup instructions in the previous section.

To remove a pairing, select the keyboard in Bluetooth preferences, then click the Delete button  next to the keyboard name.

Customize your Magic Keyboard

Change the modifier keys, assign keyboard shortcuts to menu commands in macOS applications and the Finder, and more.

To customize your Magic Keyboard:

1. Choose Apple menu > System Preferences, then click Keyboard.
2. Click Keyboard, Text, Shortcuts, or Input Sources to customize the keyboard.

Use the function keys

Use the function keys at the top of the keyboard to adjust the brightness of display, open Mission Control, access

applications with Launchpad, control the volume, and more.

Decrease ☀ or increase ☀ the brightness of the Mac display.

Open Mission Control for a comprehensive view of what's running on your Mac, including Dashboard, all your spaces, and all open windows.

Open Launchpad to instantly see all of the applications on your Mac. Click an application to open it.

Rewind or go to the previous song, movie, or slideshow.

Play or pause songs, movies, or slideshows.

Fast-forward or go to the next song, movie, or slideshow.

Mute the sound coming from the speakers or headphone port on your Mac.

Decrease 🔊 or increase 🔊 the volume of sound coming from the speakers or headphone port on your Mac.

Press and hold the Media Eject key to eject a disc.

Rename your Magic Keyboard

Your Mac automatically gives your Magic Keyboard a unique name the first time you pair it. You can rename it in Bluetooth preferences.

To rename your keyboard:

1. Choose Apple menu > System Preferences, then click Bluetooth.
2. Control-click the keyboard, then choose Rename.
3. Enter a name and click OK.

Recharge the battery

Use the Lightning to USB cable that came with your keyboard. Plug the Lightning end into the Lightning port on your keyboard, and the USB end into a USB port on your Mac or a USB power adapter.

To check the battery status, choose Apple menu > System Preferences, then click Keyboard. The battery level is shown in the lower-left corner.

Note: When you aren't using the Magic Keyboard, it goes to sleep to conserve battery power. If you won't be using your keyboard for an extended period, turn it off to conserve even more power.

Clean your Magic Keyboard

To clean the outside of your keyboard, use a lint-free cloth. Don't get moisture in any openings or use aerosol sprays, solvents, or abrasives.

Ergonomics

When using your Magic Keyboard, it's important to find a comfortable posture, change your position often, and take frequent breaks.

For information about ergonomics, health, and safety, visit the ergonomics website at www.apple.com/about/ergonomics.

More information

For more information about using your keyboard, open Mac Help and search for "keyboard."

Regulatory Compliance Information

FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See instructions if interference to radio or television reception is suspected.

Radio and Television Interference

This computer equipment generates, uses, and can radiate radio-frequency energy. If it is not installed and used properly—that is, in strict accordance with Apple’s instructions—it may cause interference with radio and television reception.

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in Part 15 of FCC rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

You can determine whether your computer system is causing interference by turning it off. If the interference stops, it was probably caused by the computer or one of the peripheral devices.

If your computer system does cause interference to radio or television reception, try to correct the interference by using one or more of the following measures:

- Turn the television or radio antenna until the interference stops.
- Move the computer to one side or the other of the television or radio.
- Move the computer farther away from the television or radio.
- Plug the computer into an outlet that is on a different circuit from the television or radio. (That is, make certain the computer and the television or radio are on circuits controlled by different circuit breakers or fuses.)

If necessary, consult an Apple Authorized Service Provider or Apple. See the service and support information that came with your Apple product. Or, consult an experienced radio/television technician for additional suggestions.

Important: Changes or modifications to this product not authorized by Apple Inc. could void the EMC compliance and negate your authority to operate the product.

This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables (including Ethernet network cables) between system components to reduce the possibility of causing interference to radios, television sets, and other electronic devices.
