PCB Covering Plate and
Battery Pack - Front View

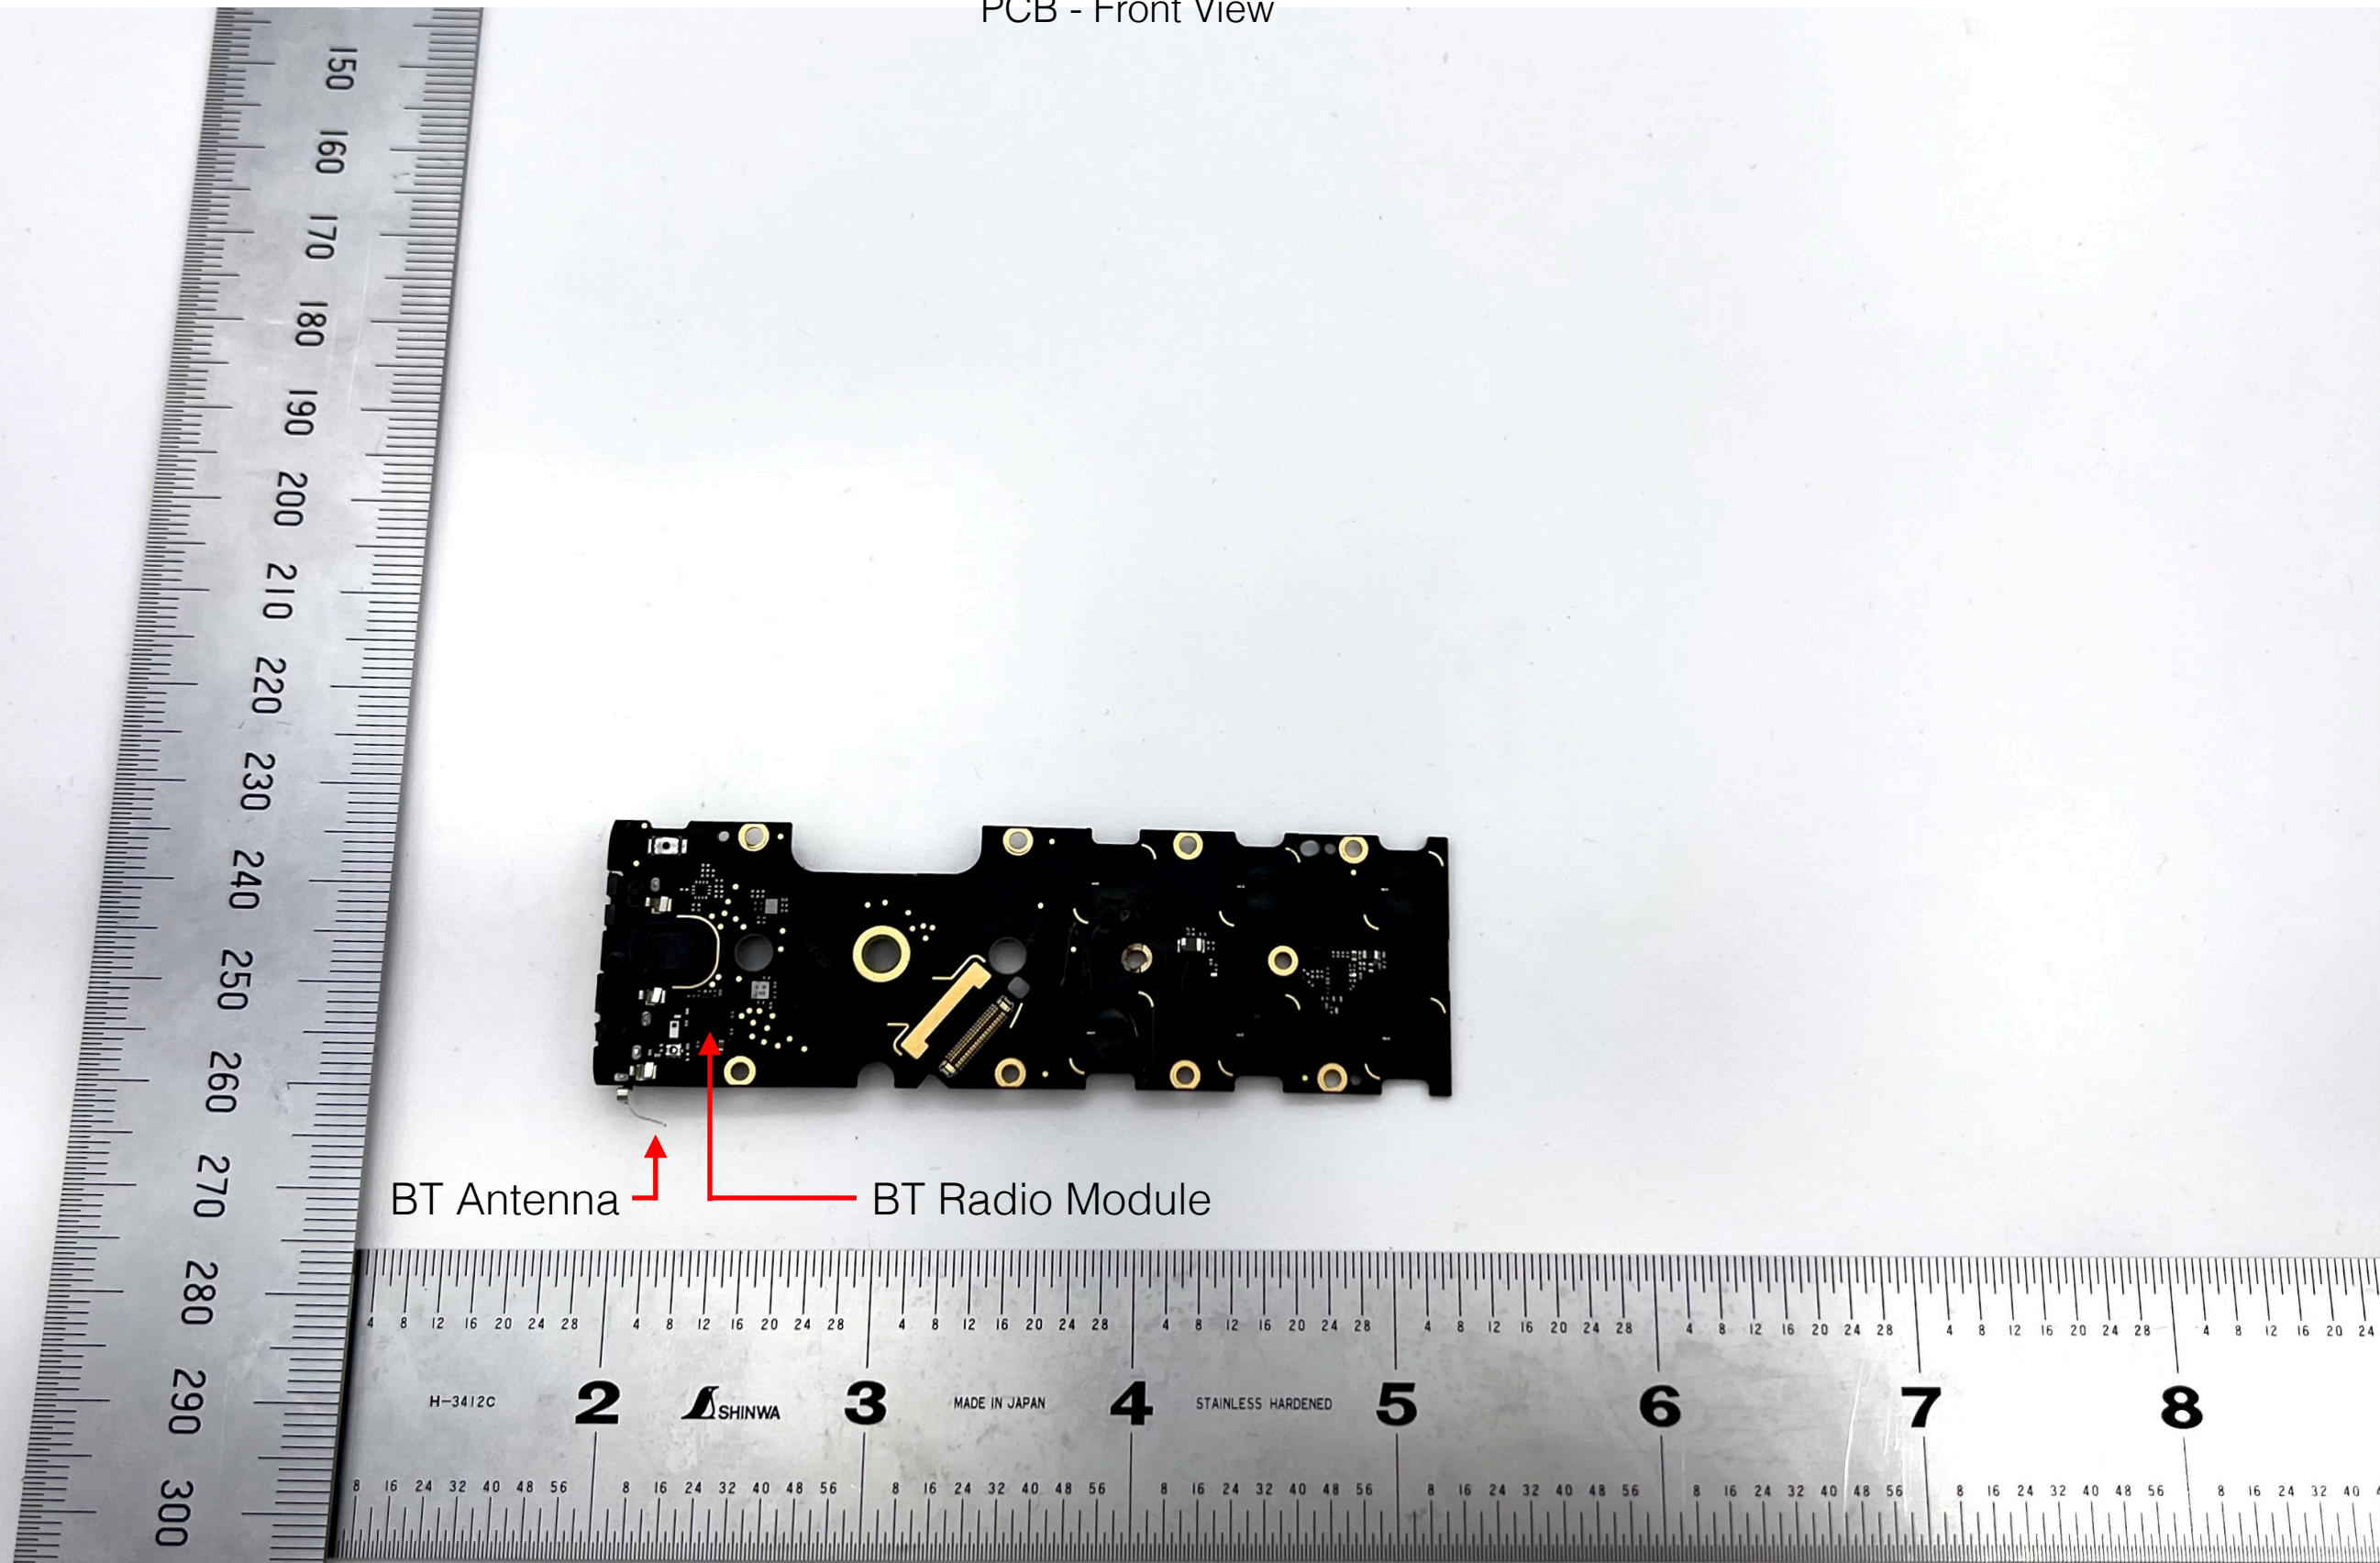

This image shows the internal components of an iPhone 6S Plus. The top half of the device reveals the black logic board populated with numerous integrated circuits, capacitors, and other electronic components. A prominent yellow flex cable connector is visible near the center. The bottom half of the phone displays the large, black lithium-ion battery, which features the Apple logo and printed safety information in English and Chinese. To the right of the battery, a silver metal bracket houses the cellular antenna system. Various circular cutouts and mounting points are distributed across the internal frame.
