RE: Class II Permissive Change Letter

For Digital Channel Module

DCM AF 727

FCC ID: BCR-AF727

Certified under FCC Rule Part 27 / Equipment Class: Livensed Non-Broadcast Station
Transmitter / Granted on January 27, 2010 by Timco Engineering Inc.

To whom it may concern:

This authorization covers the Class II Permissive Change application for the following changes:

- No Hardware change
- No Software change

The device has been certified with the emission designator F9W for CDMA and W-CDMA and the C2PC is to add the emission designator **G7D** for LTE applications with an Output Watts of 1W = 30dBm in the Uplink (698MHz - 716MHz and 776MHz – 787MHz).

Outputpower for the Downlink (728MHz – 757MHz) is 0,5W = 27dBm.

This C2PC does not affect the FCC part 27 operation measured at the FCC approval in the past.

Best Regards / Mit freundlichen Grüßen
