Subject : Reply of your question. Job 203KC9
FCC ID: BEJ42LH70UC

Dear TEI,

Thanks for your question.

I would like to answer to your question for the Job 203KC9 (BEJ42LH70UC) as below;

Question 1> USER MANUAL: The User Manual describes use of a Bluetooth Device. It appears to be built-into the Mother Board of the LCD Monitor. Therefore, this makes this application a “composite” filing meaning there are two devices to be Certified. First the LCD Monitor as a Computer Peripheral under Part 15.109. The second would be the Bluetooth Device under either FCC Part 15.247 or FCC Part 15.249. These two reports would be filed at the same time for “composite” device filing.

[Answer > This application does not include Bluetooth Module.](#)

[A Bluetooth circuit board approved FCC full Modular approval can be added later and is not installed in this application.](#)

If you need more information, please do not hesitate to contact me.

I look forward to hearing your favorable reply soon.

Best Regards,

Tae-Sig(Ted) Park, Technical Manager
Gumi College EMC Center
