|  <p>The image shows the original PCB model. A red rectangular box highlights a cluster of test points in the upper-middle section of the board. Labeled components within and around this area include PA7, PA5, PA4, PA2, PA1, PC5, M50 CSB, PC3, PC2, PC4, PC9, GND, +3.3V, C15, PB7, PB4, PB1, PB3, and PB2. The text 'ZIG BEE Module' is visible at the bottom of the board.</p> |  <p>The image shows the variation model PCB. A red rectangular box highlights a different set of test points located at the bottom of the board, near the connector area. The labels 'C20C200F-WA100' and 'K4F23C2F2' are visible above the highlighted points.</p> |

Note : **Red box** means Test point, to be confirmed by QA team in the manufacturer before mass production. The location of this part has changed.
