April 6, 2005

RE: LG Electronics

FCC ID: BEJAD5435

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Kindly observe pp. 32 of the SAR report. It appears that the s/n of the probe used in validation is missing. Please review.
- 2.) Does this device have the capability of being connected to a computer? If so, then DoFC or Certification under Part 15B may apply. Please review.
- 3.) Does the Applicant wish to consider the Canadian market? As a reminder, AmericanTCB offers Certification services for Canada with significant cost savings when filing simultaneously as FCC.
- 4.) I see the Applicant desires short-term Confidentiality. Is there a target date set yet for release of this product to the market? As a reminder, all Exhibits not subject to permanent Confidentiality under 0.459 must be released immediately once this device is marketed.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
