Subject: Questions Regarding FCC ID: BEJC375

To: Ms. Grace Loh / SGS Testing
From: Mr. Mark Czumak / PCTEST TCB

RE: FCC ID: BEJC375

Applicant: LG Electronics Inc.

Correspondence Reference Number: BEJ110470
Confirmation Number: 1Y1104080470-73
Date of Original Email: April 11, 2011

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The Bluetooth/WiFi operational description document does not provide the antenna peak gain. The Bluetooth test report provides a gain but it does not indicate if peak or average. Please provide the Bluetooth/WiFi antenna peak gain.
→ Plz find attached BT/Wi-Fi antenna sheet. We referred to the antenna information sheet.

2. There is a photograph of a WCDMA antenna in the internal photographs document. Since this does not apply to the EUT, please remove. → **The antenna is for GSM, not WCDMA. Please refer to the revised internal photo.**
3. The WiFi Body SAR values for front and back configurations given on page 18 of the SAR test report are swapped. Please revise and re-calculate the summation SAR values. → **Revised SAR report.**
4. The maximum SAR value for PCS 1900 listed on page 1 of the SAR test report is incorrect. Please revise. . → **Revised SAR report.**
5. The channel provided for the left ear tilt SAR test configuration in the table on page 23 of the SAR test report does not match the channel in the corresponding plot. Please address. . → **Revised SAR report.**
6. The justification for front body EUT WLAN SAR testing is not provided in the notes on page 24 of the SAR test report. Please revise to include this note. . → **Revised SAR report.**
7. There is no mention of WLAN hotspot capability or test results in the application. Please verify that the EUT does not have this capability nor can this capability be activated through software by the user. → **This device does not support hotspot.**
8. The Part 22/24 test report does not include PAR test results. Since an average detector was used in the testing, please provide PAR test data. → **At that time, we tested peak and average detector to compare and we choose peak detector mode result. Plz find attached revised test report. (P.27)**

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Mark Czumak
Certification Engineer
