Subject: Re : Questions Regarding FCC ID: BEJCF360 (Class II)

Hello PCTEST TCB,
Regarding the change note, it didn't change any of the following required New FCC ID.
Please send me the class II grants for CF360.
Thank you!

Best regards
Han.

RE: FCC ID: BEJCF360

Applicant: LG Electronics Inc.
Correspondence Reference Number: BEJ90628
Confirmation Number: 905200628
Date of Original Email: June 26, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

Regarding the Change note, please clarify if the RF3300 chip change from R1A to R1B did not change any of the following (per KDB 178919 2c):

Part substitution - electrically identical parts may be substituted. An initial evaluation of results will determine if a Class I or Class II application is required. A chip replacement portion of the transmitter that performs some sub-function such as an amplifier chip, oscillator chip or frequency determining chip may be considered a Class II permissive change under the following conditions; however, a replacement of chip that constitutes a complete transmitter requires a new FCC ID.

- i. The new chip component is pin for pin compatible.
- ii. The new chip has the same basic function as the old chip, from an external perspective. (Internal circuitry may differ.).
- iii. No change in radio parameters has occurred.
- iv. The same conditions apply when a small area (approximately the same as the chip) on the PCB is replaced with an equivalent chip.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,
Stephen Liu
Certification Engineer
