RE: FCC ID: **BEJCU400**

To Whom It May Concern:

This Letter is to declare that above-referenced FCC ID complies with the new FCC HAC conditions.

1) The special HAC user mode must allow the mode to be active for all calls or alternatively the mode can be activated on a per call basis by a one button press i.e. special "send" button. A user interface that requires multiple button presses for each phone call is unacceptable.

Complies

2) The mode should not allow user adjustment of the characteristics of the spectral response. That is, the user option is simply activation/deactivation of the mode.

Complies

3) Instruction for use of the special HAC mode must be given in the user information and on record in the EAS database.

Complies (See attached)

Sincerely,

A handwritten signature in black ink that reads "Daniel Kim".

Mr. Daniel Kim,
General Manager
LG Electronics Inc.
