Subject: Re: Questions Regarding FCC ID: BEJGB250G

Dear Gregory,

Thank you for your support.
We attached the revised 22/24 Test Report.
Should you have any questions, please let me know.

Best Regards,
SunHee Kim

To: Ms. Sun-Hee Kim / HCT
From: Mr. Gregory Czumak/ PCTEST TCB

RE: FCC ID: BEJGB250G

Applicant: LG Electronics Inc.

Correspondence Reference Number: BEJ90245
Confirmation Number: 903100245-47

Date of Original Email:

March 13, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Please provide PCS EDGE EIRP data on the channel that produced the highest PCS GSM EIRP, or else confirm that all channels were measured and the data submitted represents worst case.
==> Please find the revised Test Report.
2. Please correct the following typos: the PCS EDGE emission designator on pp. 1 and 3 of the 22/24 EMC report.
==> Please find the revised Test Report.
3. FYI: The SAR probe calibration points are more than 50 MHz removed from the measured bands. In accordance with the FCC Application Note 450824 D01 SAR Prob Cal and Ver Meas v01r01, this situation entails additional requirements for the tissue fluid parameters used during SAR testing (see p.4/7 of the App Note). The tissue fluid used in these SAR tests does not meet the criteria set forth in the App Note. Please note that, in the near future, this requirement will be enforced.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
Senior Certification Engineer
Quality Manager
