Hi Court,

Han/LGE successfully answer my questions. Recommend for grant. Here are the questions for the record and his responses:

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Please provide clear schematics showing component identifiers

Sent 4/3/09

1. Please confirm if WLAN is capable of VOIP for held-to-ear usage

From: 한봉호

Hello Steve,
Thank you for your quick response.
We don't have any model that supports VoIP so far.
If I have any model that supports VoIP in the future, I'll let you know that.
Thank you!

Best regards
Han.

FYI: The SAR probe calibration points are more than 50 MHz removed from the measured bands. In accordance with the FCC Application Note 450824 D01 SAR Prob Cal and Ver Meas v01r01, this situation entails additional requirements for the tissue fluid parameters used during SAR testing (see p.4/7 of the App Note). The tissue fluid used in these SAR tests (cellular and PCS bands for both the System Verification tests and the SAR tests) does not meet the criteria set forth in the App Note. Please note that, in the future, this requirement will be enforced.

FYI: Please note that, in accordance with Section 2.1033(b)(3) of the FCC Rules, the final version of the user's manual for this device must be uploaded to the FCC database when it becomes available.
