Subject: Questions Regarding FCC ID: BEJGD510

To: Ms. Sun-Hee Kim / HCT
From: Mr. Gregory Czumak / PCTEST TCB

RE: FCC ID: BEJGD510

Applicant: LG Electronics Inc.

Correspondence Reference Number: BEJ901012
Confirmation Number: 908211012-14
Date of Original Email: August 24, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The EMC reports provide additional data for a solarcell battery cover. Please describe, and provide photos. Please provide SAR data for this configuration if appropriate.

→ We revised SAR test report on page 78 ~ 92 and external, internal photo.
Please find the attachments.

2. Pursuant to FCC policy, stand alone SAR testing is required for the BT transmitter (the statement on p.22/100 of the SAR report is incorrect). Please perform these measurements, and then use the results to determine if a simultaneous SAR evaluation is required.

→ According to FCC policy(KDB648474), we don't need to perform the Stand-alone and Simultaneous transmission SARs because BT Max. output power is less than Pref(12mW) no matter the distance is less than 2.5cm. Therefore, I think we don't need to perform the Stand-alone and Simultaneous transmission SARs for GD510. Please re-check this comment. For your reference, please find the attachment.(KDB648474)

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
Senior Certification Engineer
Quality Manager
