RE: Permissive grant request for FCC ID: BEJGM750H,
Originally granted 10/14/2009

The FCCID:BEJGM750H, GM750Q cell phone is a version of the already certified, FCCID:BEJGM750H Cell Phone, and the basis of this Class2 submission. They are identically based and share a common platform. There are no changes to the PWB RF Line and antenna. There is no retuning or performance optimization. There are no changes to the mechanical parts and case. The GM750Q differs from the GM750h already certified, in that bands WCDMA 850, 1900 have been software Inhibited and disabled. The supported bands(GSM850/GSM1900) remain as previously tested, as do all conducted & Radiated emission results, previously measured and still relied upon.

A handwritten signature in black ink, appearing to read 'J.C.' with a stylized flourish underneath.
