Subject: Re: Questions Regarding FCC ID: BEJGS390
Importance: High

Hello PCTEST TCB,
Please see below response and find the attachment.
Without any problem, please let me get the grants asap.
Thank you!

Best regards
Han.

To: Mr. Bong Hyo Han / LG Electronics Inc.
From: Mr. Gregory Czumak / PCTEST TCB
RE: FCC ID: BEJGS390

Applicant: LG Electronics Inc.

Correspondence Reference Number: BEJ91448
Confirmation Number: 911301448-50
Date of Original Email: December 18, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The operational description lists GPRS Class 12 capability, however, the device was only tested to Class 10 mode. Please confirm that 3 and 4 slot transmission modes are not implemented in the EUT.

→ I confirm that 3 and 4 slot transmission modes are not implemented in the EUT.

2. All of the PCS GSM conducted output power levels are in the lower half of the acceptable power range listed in the tune- up procedure. This means that units may come off of the production line with output levels more than 1 dB higher than those tested for compliance. Please retest (EMC and SAR) a unit with PCS band conducted power levels in the upper half of the acceptable power range, per FCC policy, and submit new data. Alternatively, please revise the acceptable power range listed in the tune- up procedure and resubmit that.

→ Please find the attachment.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,
Gregory Czumak
