Dear Mr. Han,

Thank you for your email.

In regards to your response to question #3, the user's manual describes connection the EUT to a pc via a USB cable. If the EUT does not support a USB data connection, please revise the manual, removing all references to a USB connection. Also, the external photos appear to show a USB port. Please explain.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,
PCTEST TCB

RE: FCC ID: BEJGW910

Applicant: LG Electronics USA

Correspondence Reference Number: BEJ100202

Confirmation Number: 1Y1002180202-03

Date of Original Email: February 19, 2010

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The measured conducted powers for WCDMA 1900 channel 9400 HSPA Inactive in

the SAR report are higher than the target range values provided in the Tune-up procedure document. Please address.

→ Please find the attachment.(Tune-up procedure)

2. There is a duplicate photo on pages 6 and 7 of the EUT internal photo document. Please remove one.

→ Please find the attachment.

3. Since the EUT has data cable interface to a pc, please provide an FCC Part 15B Certification test report for the device.

→ This EUT doesn't support a USB data connection.

4. The 835 MHz system validation measured value provided in section 8.2 does not match what is provided on the plot on page 69 of the SAR report. Please revise.

→ Please find the attachment.

5. The maximum RF output powers for EDGE 850 and GSM 1900 on page 1 of the RF Test report do not match the table values on pages 18 and 19 of the report. Please revise.

→ Please find the attachment.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Mark Czumak
Certification Engineer
