Will, I am sorry, I thought I had responded to you on Friday. I will include this correspondence in the application to document that the Grant is only for the Bluetooth Headset and not the Car Kit. There is currently no need to update the exhibits to remove the Car Kit.

Best regards,

Chris Harvey

Dear Chris,

Could you please inform the current status of below project?
If you need the other document for below issue, please let me know.

Have a good day~!

Best regards,
Will

Dear Chris,

Thank you for your kindly information.

We are testing the Car Kit for verification.
And should we re-submit the revised document without the Car Kit information?

Have a good day~!

Best regards,
Will

Dear Harvey and Will,

You are listed as the Technical Contact for the above referenced TCB application. The following item needs to be resolved before the review can be continued:

The photographs include internal and external images of the Charging Cradle Car Kit, which is also contained in the Schematics, Block Diagram, Parts list and Parts Location exhibits. Because the Car Kit Charging Cradle is a separate device it can not be included in the Certification for this DSS equipment Class transmitter application. Please confirm that you understand that this separate Car Kit Cradle Charger device requires a separate Certification or DoC approval.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
